

# SPECTER IR

## THERMAL WEAPON SIGHT

The **SpecterIR** is a thermal weapon sighting system, which allows users to identify the heat signatures of individuals or objects in any environment. It functions without external light sources or ambient light and produces the same consistent imaging day or night cutting through rain, fog or smoke. The Specter IR is water-resistant and will withstand the forces of generated by repeated recoil from high caliber weapons. The quick-detachable mount allows for fast attachment to Mil-Std-1913 "Picatinny" rails and weapon receivers. The sight operates on three lithium AA batteries and has auxiliary power ports for operation on AC electrical outlets or vehicle cigarette lighters. A video output port allows the image to be displayed on an external video monitor or recorded by video recorder. Covered by 1-year manufacturer warranty.
