

M145

ELCAN WEAPON SIGHTS

The **M145 ELCAN** optical sight was developed specifically for the U.S. Army to be used as the main battle sight for M240 and M249 machine guns. However, with the special M4 reticle option, it can also be mounted onto M4 Carbines. The new M145 sight design features an LED illuminated reticle with 11 intensity levels and built-in ballistic compensation for the M240/249 and M4. The mounting options include a Torque Knob and Wing Nut attachment, both of which fit directly onto any MIL-STD-1913 "Picatinny" rail or receiver. The M145 weapon sight is covered with a one-year warranty against manufacturing defects.

M145 ELCAN Weapon Sight Includes:

Sight, One 3 V Li Battery, Lens Covers, Anti-glare Honeycomb Attachment, Operator's Manual

Optional Accessories for M145 ELCAN Weapon Sight:

Laser Protection Filter, Spare Batteries
