

ARS-6525

NIGHT VISION COMPATIBLE REFLEX WEAPON SIGHT

The **ARS-6525** is a red dot reflex sight for rapid target acquisition at short to medium ranges. The sight features one-piece extruded aluminum body construction. It was designed specifically with military or law enforcement user in mind. As a result, the sight is completely waterproof, even submersible, and filled with nitrogen to prevent internal fogging. It features 10-position red dot brightness adjustment with 5 daytime settings and 5 nighttime settings for use with night vision devices. ARS-6525 is fully compatible with all generations of night vision devices. Covered by Manufacturer's Limited Life Time Warranty.

ARS-6525 Weapon Sights Include:

The sight is supplied with 30 mm extra wide picatinny / weaver style mounting ring, two flip-up lens covers, two sets of batteries, hex key wrench and a manual.

- Parallax-free
- Rugged & waterproof
- Standard mount
- Night vision compatible
